

StudioAbroad SaaS

(Software as a Service)

StudioAbroad Software as a Service (SaaS) is a cost-effective version of *StudioAbroad* for smaller institutions. Using the SaaS version, your institution does not need to install or operate servers or obtain software licenses. Instead, you and your students access *StudioAbroad* as an internet application – from any computer connected to the internet – anywhere in the world.

Installation

StudioAbroad SaaS can be up and running in a matter of days. It has all the functionality of the licensed version of *StudioAbroad* except that it operates as a standalone application – it is not integrated with your campus data systems. *StudioAbroad* specialists manage the servers and perform all software upgrades to the database, operating system and application software. *StudioAbroad SaaS* runs from a professional data center with multiple network trunks to the internet, fire suppression, data backup systems and emergency electrical generators.

Website “Branding”

If your institution has your own domain name and has control of your DNS, your *StudioAbroad* website can have the URL of your current site: <http://www.myuniversity.com/studyabroad>. If not, you can use <http://yourname.studioabroad.com>. Terra Dotta can also integrate your institution’s graphics or produce a custom site design for your *StudioAbroad* website.

Costs

StudioAbroad SaaS offers a very low cost of entry with a \$1,000 annual fee. Graphics cost \$700 using a standard layout with your logo and color scheme or about \$2,000 for a custom graphics design and layout. These are your only upfront costs to start using *StudioAbroad SaaS*. There is a per-application fee of \$40 for each application processed.

How do I get StudioAbroad for FREE?

If your institution simply charges an application fee of \$40 (or raises current fees by \$40) your net annual cost to use *StudioAbroad SaaS* is just the annual fee! Or, charge a few dollars more and cover all your costs.
